(تفريغ الموجب(+))

Positive)
(discharge

This comes from getting of my negative of any positive, and in the case of my positive the number of getting of my negative converges to infinity.

حصولى على المخزن فى الارضى(ground)

The inventory in the)
(ground

This comes from getting my positive from any ground,and the case of my

ground the number of getting my positive converges to infinity.

My principles:

1-my ground

This is the center of my operation,and come after my cell&my section.

2-my positive

This is my ground then with any delta.

3-my negative

This comes from more ,and more of my grounds.

4-my direction

This comes from any ground then with my delta.

5- my lean

This comes from my direction then with the different amounts of my delta.

6-my independency

This comes in the case of my lean comming in the end of my delta.

7- my point:

This is the convergence region between my coordinates,and comes after directing of any of

my effects on any thing in the world.

8- my coordinates:

These are the regions of my operations,and comes in my combinations with my cell&my section.

9- my isometrics:

These are more,and more of my delta of any structure,and represent any of my operations.

10- my touch:

This is the rejection between my effect,and

my cell&my section,which helps in identification,controling ,and encryption of all my operations.

11- my vision:

This is the combination between my cell&my section,and my effect,which helps in the recognition of my networks.

12- my print:

This is the combination of my cell&my

section,my effect,and my interaction with the surrounding environment,which helps in Stages of production, development and analysis of my operations.

13- my delta:

This is the combination between my point ,and my all principles,which after getting of each new of this delta ,I enter in new operations.

14- my cell and my section:

This is my direction of my effect, and my cell&mysection is contained in networks networks,infinite loops, and nested loops in the whole system .

15- my atom:

This is any atom with my effect,and my atoms represent my systems.

16- my level:

This is the combination between my cell & my

section , and any level,which encompassing the whole system.

17- my ground of level:

This as the combination between my level, and my ground,which(my ground of levels) are the nearest elements for the correction ,optimization of any of my operations.

18- my volt of level:

This is my volt , which is any volt with my cell

&my section in the way of controlling the whole system.

19- my variations&the number associated with them:

These are the convergence to infinity in the number with my cell&my section,which are associated with different values of my delta.

Figure-2: My cell&my section

Figure -3:My ground& my ground of level

Figure -4:My positive

Figure -5:my negative

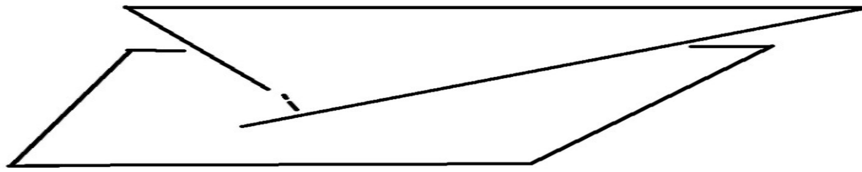

Figure -6: My level & my volt of level

The rest of my principles are combinations of the above showed elements with Hosam mostafa.
